

A89N

new innovation for anti-theft system

which carry the characters of elegance, smart and superior pick rate in all environment, even noisy one. A89N designed with slim, tall and high quality acrylic deliver a high performance system and nice outlook for retail stores.

NEAS Series

A89N - Network Electronic Article Surveillance System

Acousto Magnetic (AM)

NEAS means Network Electronic Article Surveillance System is an ideal solution for business to secure merchandise and inventory in retails. With the implementation of network monitoring concept, we successfully to come out with new series of system which is *Cost-effective, Constructive, Controllable and Credible.*

- Network monitoring
- Long-distance control
- Integrated alarm statistic
- Strong noise immunity in complicated installation environment
- Protecting full range of items in all kind of stores
- Easy synchronization with competitor's AM system in surrounding area
- Detection range up to
Hard tag – 2000mm
Am label – 1700mm

Specifications

Transmitter

Operation Frequency.....58kHz
 Transmit Burst Duration.....1.6ms
 Max Transmit Current16A peak

Receiver

Centre Frequency 58kHz

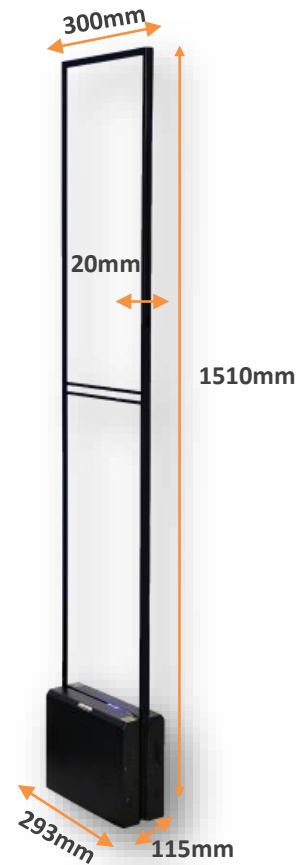

Mechanical

Height 1510mm
 Width 300mm
 Thickness 20mm
 Weight 19.2kg
 Material Acrylic
 Colour ■ Black

CORELITE A89N System Performance Analysis

with *Malaysia Retailer reference*

Company	CORELITE	Other Competitor
Model	A89	AM System
Technology	58Khz	58Khz
Width of between pedestal	6-6.5ft	5-5.6ft
Susceptible to electric noise	Yes	NO
Susceptible to lighting interference	Yes	NO
Susceptible to Environment noise	Yes	Depends (tune down sensitive avoid false alarm)
Accurate detection of label (base on maximum distance)	92% (6ft)	90% (5.5 ft)
Metal Foil Detection	Yes, 85%	-
Mode to control	4	-
Network control	Yes	-
