Network Electronic Article Surveillance System

Acousto Magnetic (AM)

NEAS means Network Electronic Article Surveillance System is an ideal solution for business to secure merchandise and inventory in retails. With the implementation of network monitoring concept, we successfully to come out with new series of system which is *Cost-effective, Constructive, Controllable and Credible.*

- Network monitoring
- Long-distance control
- Integrated alarm statistic
- Strong noise immunity in complicated installation environment
- Protecting full range of items in all kind of stores
- Easy synchronization with competitor's AM system in surrounding area
- Detection range up to
Hard tag – 2000mm
Am label – 1700mm

Specifications

Transmitter

Operation Frequency.....58kHz
Transmit Burst Duration.....1.6ms
Max Transmit Current16A peak

Receiver

Centre Frequency 58kHz

Mechanical

A89N / A69N

Height 1510mm / 1550mm
Width 300mm / 420mm
Thickness 20mm / 25mm
Weight19.2kg / 20kg
Material Acrylic
Colour  Black

CORELITE NEAS Series - System Performance Analysis

with Malaysia Retailer reference

Company	CORELITE	Other Competitor
Model	NEAS	AM System
Technology	58Khz	58Khz
Width of between pedestal	6-7ft	5-5.6ft
Susceptible to electric noise	Yes	NO
Susceptible to lighting interference	Yes	NO
Susceptible to Environment noise	Yes	Depends (tune down sensitive avoid false alarm)
Accurate detection of label (base on maximum distance)	92% (6ft)	90% (5.5 ft)
Metal Foil Detection	Yes, 80%	-
Mode to control	4	-
Network control	Yes	-
